

Marks Heeley Ltd

Unilever

Description:

MH carried out full engineering design services on this highly serviced modern laboratory centre.

The buildings constructed in two phases provide 5400m² of laboratory and related facilities with extensive plant rooms of 1875m² at second floor (roof level).

The buildings are constructed on piled foundations, with a two storey insitu concrete frame and steelwork roof structure. The buildings have a 9.0 x 9.0m grid providing large column free zones and flexibility for future reconfiguration. At ground level, mass concrete isolation bases are provided for the support of highly sensitive

Client: Unilever U.K

Contract: Design and Build

MH were initially engaged by Unilever to assist with the structural employers brief. The role developed to MH's novation to Shimizu (UK) Ltd whom carried out the construction works.

Overall Project Value: £9.5m
